KEY WORDS: Orthoptera, Acrididae, Oedipodinae, *Angaridella*, *Marikovskiella*, *Gastrimargus*, *Gastrimargulus*, homonyms, new names.

КЛЮЧЕВЫЕ СЛОВА: Orthoptera, Acrididae, Oedipodinae, *Angaridella*, *Marikovskiella*, *Gastrimargus*, *Gastrimargulus*, омонимия, новое название.

ABSTRACT. The names of the subgenus *Angaridella* Benediktov, 1998 (genus *Bryodemella* Yin, 1982) (nec *Angaridella* Kolesnikov, 1980 — fossil Mollusca: Bivalvia) and genus *Gastrimargus* Saussure, 1884 (nec *Gastrimargus* Spix, 1824 — Mammalia: Primates) are determined as junior homonyms. New replacement names proposed: *Marikovskiella* **nom.n.** and *Gastrimargulus* **nom.n.** 31 new combinations are established.

РЕЗЮМЕ. Установлено, что названия подрода *Angaridella* Benediktov, 1998 (род *Bryodemella* Yin, 1982) (nec *Angaridella* Kolesnikov, 1980 — fossil Mollusca: Bivalvia) и рода *Gastrimargus* Saussure, 1884 (nec *Gastrimargus* Spix, 1824 — Mammalia: Primates) являются младшими омонимами. Предложены замещающие названия: *Marikovskiella* **nom.n.** и *Gastrimargulus* **nom.n.**, соответственно. Установлена 31 новая комбинация.

Introduction

As was determined, the names of the subgenus *Angaridella* Benediktov, 1998 (genus *Bryodemella* Yin, 1982) and name of the genus *Gastrimargus* Saussure, 1884 of the locusts in Oedipodinae subfamily (Orthoptera, Acrididae) are junior homonyms. However till now these names are used as valid, also these names do not have synonyms. According to the Articles 52.1, 53.2 and 60.3 of the International Code of Zoological Nomenclature [2000] we give new replacement names to these taxa.

Subgenus *Marikovskiella* Benediktov, **nom.n.** (genus *Bryodemella* Yin, 1982)

Subgenus *Angaridella* Benediktov, 1998 (genus *Bryodemella* Yin, 1982) — Zool. Zh. 77 (7): 796 [in Russian]; nec *Angaridella* Kolesnikov, 1980: 27 — In.: Limnobiots drevnikh ozernykh bassejnov Evrazii. L. Nauka. [in Russian] — fossil Mollusca: Bivalvia.

SPECIES COMPOSITION AND DISTRIBUTION. The subgenus includes 3 species and 3 subspecies [Benediktov, 1998]: *Bryodemella* (*Marikovskiella*) *semenovi* (Ikonnikov, 1911) — South East Kazakhstan; *B. (M.) orientale orientale* (Bey-Bienko, 1930) — Mongolia; *B. (M.) orientale simulans* (Stebaev, 1964) — South Tyva; *B. (M.) zaisanicum zaisanicum* (Bey-Bienko, 1930) — Kazakhstan; *B. (M.) zaisanicum fallax* (Bey-Bienko, 1930) — North West Mongolia, Western China; *B. (M.) zaisanicum ferrugineum* (Huang et Chen, 1982) — North West China.

This subgenus is named by professor P.I. Marikovskiy (1912–2008), who has made an important contribution to investigation of nature of Central Asia (Semirechje).

Genus *Gastrimargulus* Benediktov, **nom.n.**

Gastrimargus Saussure, 1884 — Mem. Soc. Phys. Hist. Nat. Geneve 28 (9): 110; nec *Gastrimargus* Spix, 1823: Simiarum et vesp. Brasil. Spec. Nov.: 39 — Mammalia: Primates.

SPECIES COMPOSITION AND DISTRIBUTION. The genus includes 23 species and 8 subspecies [Huang, 1981; Ritchie, 1982]: *Gastrimargulus acutangulus acutangulus* (Stål, 1873) **comb.n.** — southern Africa, Malawi, Zambia; *G. acutangulus flavipes* (Johnston, 1937) **comb.n.** — Kenya; *G. africanus africanus* (Saussure, 1888) **comb.n.** — Sub-Saharan Africa, South East Arabia, India; *G. africanus madagascariensis* (Sjöstedt, 1928) **comb.n.** — Madagascar; *G. africanus parvulus* (Sjöstedt, 1928) **comb.n.** — Indo-China, Java, Kangean Isl.; *G. africanus sulphureus* (Bey-Bienko, 1951) **comb.n.** — mountains of Pakistan, Kashmir and Nepal; *G. angolensis* (Sjöstedt, 1928) **comb.n.** — Angola, Zambia; *G. crassicolis* (Saussure, 1888) **comb.n.** — Zimbabwe, South Africa; *G. determinatus determinatus* (Walker, 1871) **comb.n.** — Cape Province; *G. determinatus arabicus* (Uvarov, 1936) **comb.n.** — Arabia; *G. determinatus procerus* (Gerstaecker, 1889) **comb.n.** — West and Central Africa, Uganda; *G. determinatus vitripennis* (Saussure, 1888) **comb.n.** — East and South Africa; *G. drakensbergensis* (Ritchie, 1982) **comb.n.** — South Africa; *G. hyla* (Sjöstedt, 1928) **comb.n.** — Ethiopia; *G. immaculatus* (Chopard, 1957) **comb.n.** — Reunion Isl.; *G. insolens* (Ritchie, 1982) **comb.n.** — Angola; *G. lombokensis* (Sjöstedt, 1928) **comb.n.** —

Lombok, Kangean, Sumbawa, Sunba and Flores Isl.; *G. marmoratus* (Thunberg, 1815) **comb.n.** — South East Asia; *G. miombo* (Ritchie, 1982) **comb.n.** — Central Africa; *G. mirabilis* (Uvarov, 1923) **comb.n.** — Angola, Zaire, Zambia, Uganda; *G. musicus* (Fabricius, 1775) **comb.n.** — Australia, Tasmania, New Guinea, Solomon Isl.; *G. nubilus* (Uvarov, 1925) **comb.n.** — Himalayas; *G. obscurus* (Ritchie, 1982) **comb.n.** — Zaire, Angola; *G. ochraceus* (Sjöstedt, 1928) **comb.n.** — Ivory Coast, Ghana, Zaire; *G. ommatidius* (Huang, 1981) **comb.n.** — Tibet; *G. rothschildi rothschildi* (Bolivar, 1922) **comb.n.** — Ethiopia; *G. rothschildi luteifemur* (Ritchie, 1982) **comb.n.** — Ethiopia; *G. sarasini* (Saussure, 1884) **comb.n.** — New Caledonia; *G. subfasciatus* (Haan, 1842) **comb.n.** — Timor; *G. verticalis verticalis* (Saussure, 1884) **comb.n.** — eastern and southern Africa, Madagascar; *G. verticalis mpwapwae* (Ritchie, 1982) **comb.n.** — Tanzania; *G. wahlbergii* (Stål, 1873) **comb.n.** — Eastern South Africa; *G. willemsei* (Ritchie, 1982) **comb.n.** — New Guinea.

This investigation has been supported by program “Biological variety: structure, stability, evolution” (project RNP 2.1.1.7167).
