Zoological Museum of Moscow State University, Bol'shaya Nikitskaya str. 6, Moscow 125009, Russia.
Зоологический музей Московского государственного университета, ул. Большая Никитская, 6, Москва 125009, Россия.

KEY WORDS: Coleoptera, Cryptophagidae, fauna, China, Oriental Region, Central Asia.

КЛЮЧЕВЫЕ СЛОВА: жуки, Cryptophagidae, фауна, Китай, Ориентальная область, Центральная Азия.

ABSTRACT. The article offers a list of species recorded in China and adjacent regions, to outline the dimensions and composition of China's fauna for the family in question. For the territory of China noted 80 species, including 11 species new to the country, many species marked for neighboring countries.

РЕЗЮМЕ. В работе приведён список видов, отмеченных в Китае и на сопредельных территориях, что позволяет представить объём фауны Китая по исследуемому семейству. Для территории Китая отмечено 80 видов, 11 из которых — новые для страны. Многие виды отмечены для сопредельных с Китаем стран.

Introduction

The beetle family Cryptophagidae is classified within the Clavicornia of the superfamily Cucuoidea. Cryptophagidae are represented in all major biogeographical regions, but species diversity is greatest in the tropical regions of Africa, Asia and the Americas.

The family Cryptophagidae currently includes approximately 51 genera and over 600 described species arranged in three subfamilies [Leschen, 1996]. Most species of Cryptophagidae are mycophagous, however, other feeding strategies and food sources are also used (e.g., phytophagy, myxomycophagy) [Leschen, 1999, 2006]. The family also comprises nidicolous beetles which live in burrows and nests of other animal species, and includes a number of species closely associated with social insects: bees, bumblebees, ants and termites [Lyubarsky, 1996, 2002; Leschen, 1999; Haddad et al., 2008]. Cryptophagidae have also been discovered in nests of mammals and birds [Waage, 1979], as well as in lepidopteran larval nests [Branco et al., 2008]. Many cryptophagids are pyrophilic beetles, i. e. attracted by forest fires, arriving first to disturbed habitats [Muona & Rutanen, 1994; McCullough et al., 1998; Wikars & Schimmel, 2001; Billings et al., 2004; Wikars et al.,

2004; Moretti et al., 2004; Parker et al., 2006]. Some genera have paired deep depressions at the ventral side of the pterothorax, which function as mycangia [Wikars & Elewi, 1997]. It is possible that fungi that persist in micangia then grow in new habitats to serve as food for these mycophagous beetles [Wheeler & Blackwell, 1984; Grebennikov & Leschen, 2010; Gullan & Cranston, 2010].

Both adults and larvae of Cryptophagidae are commonly found on mold, fungi, under bark, as well as in decaying vegetation. Therefore, collection data for cryptophagids shows a strong bias for habitats close to the ground (e.g., leaf litter, fallen logs, stumps, dung etc.). In most cases where cryptophagids are considered pests, the beetles infest stored food products [Coombs & Woodroffe, 1955; Triplehorn, 1965; Eliopoulos & Athanassiou, 2004], feeding primarily on molds and secondarily on the product itself. Other species are mainly scavengers living on debris and nest materials. These beetles are often found in bird nests and burrows of mammals. The pollen of flowering plants is also an important food source for the species of the genus *Antherophagus* Dejean, 1821. Very few cryptophagid species exhibit cave-dwelling or troglodytic habits.

The fauna of the family Cryptophagidae of the wide region including China and several neighboring countries in South-East Asia has been studied in several papers [Bruce, 1945, 1952; Johnson, 1970, 1971, 1975; Sen Gupta, 1978, 1980; Sen Gupta & Basak, 1985; Sen Gupta & Pal, 1980; Lyubarsky 1997a,b, 1998, 1999], but the region has not been studied sufficiently. Recently, the nomenclature has changed, with some species names becoming synonymous [Johnson, 2007]. The Zoological Museum of Moscow State University holds extensive collected material from China and SE Asia. Faunistic investigations have revealed new important details on the distribution of many species. Now it is possible to present the list of species of the Cryptophagidae from China and adjacent regions.

The fauna of northern China is very close to the fauna of Mongolia and Russian Far East, especially Primorye (Maritime) Territory. This is due to the fact that this region belongs to the subzone of humid monsoon mixed forests. Sikhote-Alin area includes zones from bald mountains to deciduous forests. This Asian deciduous forest zone extends to eastern China, Japan, and southern part of Russian Far East. The similarity of the floristic structure of these regions explains a substantial similarity of their insect fauna.

Some widespread in Central Asia species are penetrate into North China. Similarly, the Himalayan complex of species penetrates into Central China. These species are distributed in Nepal, Bhutan, and north-eastern part of India, in Uttar-Pradesh, Sikkim etc. Interpenetration of the Holarctic, Sino-Himalayan, and Oriental fauna occurs on very large areas, making a biogeographical zoning of Asia difficult. Therefore, it is useful to compare the distribution of species in China and some other Asian countries.

A detailed analysis of the Palearctic zoogeographical division in terms of the interaction of Holarctic fauna and the Sino-Himalayan fauna, summarizing the views of different authors can be found in the review by Sazonov [2012]. The following list of species includes species recorded from China, indicating their distribution in the surrounding areas, including the species common in Nepal and India, the eastern regions of Central Asia, Mongolia and Russian Primorye.

In general, wider distribution and regional boundaries follows the last catalogue of the group [Johnson, 2007] with later additions [Lyubarsky, 2008]. The following list treats the boundaries of the Palearctic Region as established in the catalogue [Johnson, 2007].

In the section "Material" mainly liss the specimens that are stored in the Zoological Museum of Moscow State University. The section "Distribution" is a generalized indication of the distribution as well as a more detailed indication of the spread in countries adjacent to China.

The list contains 177 species; 80 of them are recorded in the territory of China, of which 11 are new to the fauna of China: *Antherophagus fursovi* Lyubarsky, 1991, *A. pallens* Linne, 1758, *A. similis* Curtis, 1835, *Cryptophagus atratus* Champion, 1922, *C. bruckii* Reitter, 1875, *C. cellaris* (Scopoli, 1763), *C. dzhungaricus* Lyubarsky, 2000, *C. punctipennis* Brisout de Barneville, 1863, *C. skalitzkyi* Reitter, 1875, *Atomaria atra* (Herbst, 1793), *Atomaria peltatula* Reitter, 1888. Four species were recorded as new to the different provinces of China. The list includes the new species for the fauna of the different neighboring countries of Central Asia and the fauna of the Oriental region: Kazakhstan — 6 species, Turkmenistan — 5 species, Uzbekistan — 2 species, Kyrgyzstan — 5 species, Tajikistan — 4 species, Mongolia — 1 species, Russian Far East — 2 species, Myanmar (Burma) — 4 species, Vietnam — 1 species, Thailand — 1 species.

(2 spec.); Mongun-Taiginsky area, Kara-Beldyr, 8.06.1978, nest of Long-tailed Ground Squirrel (*Spermophilus undulatus*), leg. Suntsova N. (2 spec.); Amur region, Zeya reserve, 3–9.07.1978, leg. Kurbatov S.A. (1 spec.); Ussurijsky reserve, 20.07.1987, leg. Kurbatov S.A. (1 spec.); Voroshilovsk, 7–8.1956, leg. Nikulin (1 spec.).

DISTRIBUTION. Europe, Caucasus, C Asia, Siberia, Far East, Nearctic. — **China:** Inner Mongolia; Kazakhstan; Turkmenistan; Uzbekistan; Kyrgyzstan; Tajikistan; Mongolia; Russian Far East.

Cryptophagus querċinus Kraatz, 1852

MATERIAL. **Turkmenistan:** Kopet Dagh, Aidere, meadows upper Sumbar river, 19–22.05.1986, leg. Lobanov A. (1 spec.); **Uzbekistan:** Karatau, Navoiy env., S Olovianka, 6.05.1994, leg. Dovgailov K. (1 spec.); **Kyrgyzstan:** Bishkek, 12.06.1930, leg. Dementiev, (1 spec.); **Russian Far East:** Kuril Islands, SW Kunashiri, 19.07.1989, leg. Kurbatov S. (1 spec.).

DISTRIBUTION. Europe, Caucasus, C Asia, Russian Far East. — Can be found in China; Kazakhstan; new to **Turkmenistan**, new to **Kyrgyzstan**; Uzbekistan.

Cryptophagus reboredae Otero, 2001

DISTRIBUTION. Oriental Region: N Thailand. — Can be found in China.

Cryptophagus reflexus Rey, 1889

MATERIAL. **Kyrgyzstan:** Osh region, Djidalik, nest of *Apodemus uralensis*, 14.10.1986, leg. Rybin S.N. (1 spec.); Karakol (Przhevalsk), cave, 11.04.1942, leg. Lyubitshev A.A. (1 spec.); **Turkmenistan:** Repetek, 23.12.1982, leg. Krivokhatsky (1 spec.); Badhyz, 7.03.1979, leg. Atamuradov Kh.I. (1 spec.); **Uzbekistan:** Tashkent, 10.1919, coll. Ivanov I.I. (2 spec.).

DISTRIBUTION. Palaearctic. — **China:** Inner Mongolia; Turkmenistan; Kyrgyzstan; Tajikistan; Mongolia; Russian Far East.

Cryptophagus rufomaculus Lyubarsky, 2000

MATERIAL. **Russia:** Primorye, Vladivostok, 9.05.1979, leg. Lafer G. (1 spec.); Ussurijsky reserve, 15.07.1987, leg. Kurbatov S.A. (1 spec.); Zeya reserve, 1.07.1978, leg. Belov V.V., Kurbatov S.A. (1 spec.) [Lyubarsky, 2000].

DISTRIBUTION. Russian Far East. — Can be found in China.

Cryptophagus saginatus Sturm, 1845

MATERIAL. **Kazakhstan:** Zhetysu (Semirechye), coll. Ivanov I.I. (1 spec.); **Turkmenistan:** Keikodona gorge, 14.05.1968, leg. Tikhomirova A. (1 spec.); **Russia:** Primorye, Vladivostok, 2.03.1979, leg. Krivolutskaya G.O. (1 spec.); same data, 10–12.1978, leg. Krivolutskaya G.O. (4 spec.); Shkotovsky area, Ussuryisky reserve, nests *Polygraphus* sp., 7.06.1971, leg. Arefin (1 spec.); Amur region, Myao-Chan Ridge, 21.08.1982, leg. Kabakov O.N. (1 spec.).

DISTRIBUTION. Palaearctic, Australian, Nearctic, Neotropical Region. — Kazakhstan; Turkmenistan; Russian Far East. Can be found in China.

Cryptophagus scanicus Linnaeus, 1758

MATERIAL. **Kazakhstan:** S Dzhungaria, 1.06.1968, leg. Sokolov E. (1 spec.); **Russia:** Dichun near Radde, Amur river,

08.1978, leg. Kurbatov S.A. (10 spec.); Dichun near Radde, Amur river, 08.1978, leg. Belov V.V. (6 spec.); Primorye, Vladivostok, 10–12.1978, leg. Krivolutskaya G.O. (1 spec.); Primorye, Chernigovsky area, Gribnoe, in dead bees, 20.04.2000, leg. Kuznetsov V. (4 spec.); Zeya reserve, 27.06., leg. Kurbatov S.A. (1 spec.); Ussuriysky area, 18 km SE Ussuriysk, Gornotaezhnoe, 27.06.1995, leg. Dubatolov V.V., Dudko A.Yu. (1 spec.); Amur region, Bashurovo, 21.07.1980, leg. Alekseev (1 spec.).

DISTRIBUTION. Palaearctic, Afrotropical, Nearctic. — New to Kazakhstan; Russian Far East; can be found in China.

Cryptophagus schmidti Sturm, 1845

MATERIAL. **Kazakhstan**: Makanchi Distr., Tarbagatay Mts., Kyzylbulak river valley, h=1100–1200 m, *Populus*, *Malus*, *Salix* forest, 22.06.2001, leg. Golovatch S. (2 spec.); **Russia**: Primorye, Sinelnikovo, Suifen, 23.09.1975, leg. Lafer G.Sh. (2 spec.).

DISTRIBUTION. Europe, Caucasus, W Asia, C Asia, Far East. — Kazakhstan; Russian Far East; can be found in China.

Cryptophagus scutellatus Newman, 1834

DISTRIBUTION. Palaearctic, Nearctic. — China: grain-storage [Yan et al., 2010].

Cryptophagus simplex Miller, 1858

MATERIAL. **Uzbekistan**: W Tian-Shan, Kuraminsky Mt., Angren plate, h=2600 m, burrow of relict gopher *Citellus relictus*, 14–23.07.1983, leg. Ageeva (57 spec.); **Kyrgyzstan**: Kara-Alma, 10.07.1945, leg. Arnoldi K. (1 spec.); Kichik Alai, Kara-Goy, h=2400 m, 21–22.05.1993, leg. Schawaller W. (1 spec.).

DISTRIBUTION. Europe, C Asia. — Uzbekistan; Kyrgyzstan; can be found in China.

Cryptophagus simulator Grouvelle, 1916

MATERIAL. **India**: Himachal Pradesh, Simla, Kufri, 16.07.1989, leg. Riedel A. (4 spec.) [Lyubarsky, 1997a]; **Nepal**: Panchthar Distr., h=2300 m, mixed broadleaved forest, 16–20.04.1988, leg. Martens J., Schawaller W. (1 spec.); Solukhumbu Distr., h=2700 m, 20.05.1997, leg. Schawaller W. (1 spec.); Taplejung Distr., upper Simbua Khola Valley, near Tseram, h=3250–3350 m, mature *Abies-Rhododendron* forest, 10–15.05.1988, leg. Martens J., Schawaller W. (1 spec.); Dailekh Distr., Dailekh to Mabuchin Pass, h=2300 m, 3–4.06.1998, leg. Schawaller W. (1 spec.) [Lyubarsky, 1999].

DISTRIBUTION. S Palaearctic. — India: Himachal Pradesh, Uttar Pradesh, Sikkim; Pakistan: Murree; Nepal; can be found in China.

Cryptophagus skalitzkyi Reitter, 1875

MATERIAL. **China**: Xinjiang, Tian-Shan Mts., Khalyktau ridge, upp. Kuqa river, 3 km Dalongchi, h=2450 m, *Picea schrenkiana* litter, 9.06.2001, leg. Saluk S. (1 spec.); **India**: Kashmir, Tangmarg, Pir Panjal Mts., h= 2600 m, 21–25.05.1976, leg. Martens J., Schawaller W. (4 spec.); **Kazakhstan**: Dzhungarsky Alatau, Tastau river basin, Arkantirgen river, litter, h=1800 m, 8–11.08.1991, leg. Tishechkin A.K. (20 spec.); Charyn val., W Chundza, h=800, 10–13.06.1993, leg. Schawaller W. (3 spec.); Almaty area, Uigursky distr., 11 km NW Chunja, Chrym river canyon, h=650 m, riverine *Fraxinus*, *Populus*, *Salix* etc. forest, 29–31.05.2001, leg. Golovatch S. (4 spec.); Almaty area, Uigursky distr., 5 km SE Kyrgyzsar (=Podgorne), Ketmen Mts., h=1900 m, *Picea*, *Betula*, *Populus*, etc. forest, 1–2.06.2001, leg. Golovatch S. (4 spec.); Almaty area, Uigursky distr., Zharkent (=Panfilov distr.), 8 km N Sarybel, Dzhungarsky Alatau Mts., Tyshkan river canyon, h=1700–1800 m, *Picea* forest with *Salix*, *Berberis* etc. bush, 6–7.06.2001, leg. Golovatch S. (1 spec.); **Turkmenistan**: Lebap Province, Garabekewil District, Lambe, 20.05.1978, leg. Kompantsev A.B. (1 spec.); **Uzbekistan**: Samarkand; Tashkent, leg. Ahnger; **Kyrgyzstan**: Tyup, near Shaty, 30.08.1987, leg. Kurbatov S. (1 spec.); Osh Province, Uzgen, Karashogo, 12.09.1983, leg. Rybin S. (1 spec.); Osh Province, Uzgen, Karashogo, *Apodemus uralensis*, 17.09.1986, leg. Rybin S. (1 spec.); Osh Province, Djidalik, *Apodemus uralensis*, 14.10.1986,

leg. Rybin S. (1 spec.); Osh Province, Naukat, corpse of *Apodemus uralensis*, 16.09.1987, leg. Rybin S. (11 spec.); Osh Province, Gouyan, 6 km S Khaidarnot, corpse of *Alticola argentatus*, 26.09.1986, leg. Rybin S. (1 spec.); Terskej Alatau, Ak-Su, h=2100 m, 14–18.06.1993, leg. Schawaller W. (2 spec.); Chu Valley, Vasiljevka vill., 20.05.1970, leg. Ovtchinnikov S. (1 spec.); Issyk-Kul bank, S Chon-Urjukty, h=1600 m, 19–23.06.1993, leg. Schawaller W. (1 spec.); Kichik Alai, Kara-Goy, h=2400 m, 21–22.05.1993, leg. Schawaller W. (6 spec.); **Tajikistan**: Kuraminsky ridge, Puli-Khodzhak, h=1300 m, 4–6.1974, leg. Yanushev V. (3 spec.); Fann Mountains, Marguzor lake, h=2500 m, 20–29.04.1992, leg. Alekseev S.K. (2 spec.); Hissar ridge, Kondara, in fungi, 18.04.1978, leg. Danilevsky M.L. (1 spec.); Tigrovaya Balka Nature Reserve, in place where Vakhsh River and the Panj River join to form the Amu Darya, 7.06.1987, 20.04.1986, leg. Kompantzev A.V. (2 spec.); Panj Karatau, h=1700 m, 23.04.1991, leg. Ovtchinnikov S. (1 spec.); Roshtkala, in fungi, 26.07.1978, leg. Danilevsky M.L. (1 spec.).

DISTRIBUTION. Europe, Caucasus, C Asia, Siberia. — New to **China**: Xinjiang; India: Kashmir; Kazakhstan; Turkmenistan; Uzbekistan; Kyrgyzstan; Tajikistan.

Cryptophagus subdepressus Gyllenhal, 1827

MATERIAL. **Russia**: Kuril Islands, Kunasiri, Golovina Mt., 25.07.1973, leg. Kerzhner I.M. (1 spec.); Primorye, Khasansky area, Kedrovaya Pad reserve, 24.07.1987, leg. Kurbatov S.A. (1 spec.); Amur river, Zeya reserve, 7.07.1978, leg. Kurbatov S.A. (1 spec.); Lazovsky reserve, Proselochnaya bay, 1–5.05.1996, leg. Yu. Sundukov (2 spec.).

DISTRIBUTION. Palaearctic. — Russian Far East; can be found in China.

Cryptophagus subfumatus Kraatz, 1856

MATERIAL. **Turkmenistan**: Ashgabat (1 spec.); Repetek, 12.05.1913, in coll. Fursov N.I. (1 spec.); **Uzbekistan**: Tashkent; Sizhak, in fungi, 15.05.1961, leg. Zhatiev R.D. (1 spec.); Tashkent, leg. Makowsky; **Kyrgyzstan**: Ferghana Alatau, Yarodar, h=1400–1500 m, 16–19.05.1993, leg. Schawaller W. (1 spec.); Nicolaipol, 15.05.1907, leg. Fischer E. (1 spec.); Thalass-Thal, 11.1907, leg. Fischer E. (1 spec.); Chatkal Ridge, Sary-Celek, h=1400–1600 m, 27–31.06.1993, leg. Schawaller W. (1 spec.); **Tajikistan**: Kharshi river; **Russia**: Primorye, Vladivostok, 08.1980, leg. Krivolutzkaya G.O. (2 spec.); same data, 09.1977, leg. Krivolutzkaya G.O. (4 spec.); same data, 03.1979, leg. Krivolutzkaya G.O. (4 spec.); Dichun near Radde, Amur river, 10.08.1978, leg. Belov V.V. (1 spec.); Primorye, Chernigovsky area, Gribnoe, dead bees *Apis mellifera*, 20.04.2000, leg. Kuznetsov V. (2 spec.); Lasovsky reserve, 20.04.1996, Sundukov Yu. DISTRIBUTION. Siberia, Far East. — Mongolia; Russian Far East; can be found in China.

Atomaria plicibasis Reitter, 1846

MATERIAL. **Russia:** Primorye, Khabarovskiy region, Bureinsky reserve, litter under *Populus suaveolens* in deciduous forest, h=550 m, 19.06.2011, leg. Ryvkin A.B. (1 spec.); the same data, 25.06.2011; Lazovsky reserve, Petrova bay, 20.04.1996, leg. Sundukov Yu. (1 spec.).

DISTRIBUTION. Siberia, Far East. — Russian Far East; can be found in China.

Atomaria pudica C. Johnson, 1971

MATERIAL. **Nepal:** Ilam Distr. road from Ilam to Birtamode, Kaphok, 1700 m, cultivated land with bushes, 2.04.1980, leg.

Martens J., Ausobsky (1 spec.); Ilam Distr., Mai Pokhari, 2100–2200 m, *Castanopsis* forest remains, 9–10.04.1988, leg. Martens J., Schawaller W. (4 spec.); Dolakha Distr., SW Kalinchok Mt., 3100 m, 19–23.04.1995, leg. Martens J., Schawaller W. (1 spec.) [Lyubarsky, 1999]; **Myanmar**: env. Maymyo, h=700–900 m, 4–5.03.1996, leg. Kurbatov S. (1 spec.).

DISTRIBUTION. China: Fujian, Guandong, Hongkong, Taiwan; India: Sikkim, Bengal, Uttar Pradesh; Nepal; new to Myanmar.

Atomaria pulchra Erichson, 1846

MATERIAL. **Turkmenistan**: SW, env. of Kara-Kala, h=1700 m, 16.04.1993, leg. Kurbatov S. (2 spec.).

DISTRIBUTION. Europe, Caucasus, Afghanistan, new to Turkmenistan. — Can be found in China.

Atomaria punctatissima Reitter, 1877

MATERIAL. **China**: E Hubei, Shennongia Nat. Reserve, env. Macheng, Longsheng, h=500 m, litter, 29.05.1995, leg. Kurbatov S. (1 spec.); **Russia**: Kamchatka, Esso, 3–7.08.1990, leg. Saluk S. (3 spec.) [Lyubarsky, 2008].

DISTRIBUTION. China: Hubei; Russian Far East; Japan.

Atomaria punctipennis Reitter, 1888

MATERIAL. **Russia**: Primorye, Amur region, Mazanovsky area, Selemdja river, 12–30.08.2006, leg. Ryvkin A.B. (13 spec.); Khabarovsk (1 spec.).

DISTRIBUTION. Siberia, Far East. — China: Jilin, Woosung (near Shanghai); Russian Far East.

Atomaria pusilla Paykull, 1798

MATERIAL. **Kyrgyzstan**: Issyk-Kul region, Tup, litter under stones, 5.09.1981, leg. Kurbatov S.A. (1 spec.); **Tajikistan**: Hissar ridge, near Duschanbe, Kondara, h=1200 m, 10.06.1973, leg. Yanuschkev V. (3 spec.); the same data, 4.08.1969; Duschanbe, Varzob river, 26.10.1984, leg. Gratschev V.G. (1 spec.); Hissar Ridge, Varzob, 10.07.1932, coll. Fursov N.I. (2 spec.); **Uzbekistan**: Samarkand, 27.05.1940, coll. Fursov N.I. (1 spec.); **Russia**: Primorye, Ussurijsk area, Kamenushka, 4.07.1989, leg. Nikitsky N.B. (1 spec.); the same data, 27.06.1980, leg. Nikitsky N.B. (1 spec.); the same data, 15.06.1984, leg. Nikitsky N.B. (1 spec.); the same data, 30.06.1984, leg. Nikitsky N.B. (5 spec.); the same data, 21.05.1984, leg. Nikitsky N.B. (1 spec.); the same data, 26.06.1989, leg. Nikitsky N.B. (1 spec.); Amur region, Mazanovsky area, Selemeja river, near Nora river, h=220 m, 12.08.2006, leg. Veselova E.M., Ryvkin A.B. (1 spec.); Amur region, Selemejinsky area, Norsky reserve, Selemeja river, 18.08.2006, leg. Ryvkin A.B., Veselova E.M. (1 spec.); Primorye, near Anisimovka, litter, 05.08.1977, leg. Moroz, Krivolutz-kaya 91 spec.); Sakhalin, 15 km Bykovo, Naiba river, 15.08.1991, leg. Gratchev V.G. (1 spec.); Amur region, Birobidjansky area, Bastak reserve, h=170 m, 22.07.2011, leg. Ryvkin A.B. (1 spec.); Amur region, Selemejinsky area, Norsky reserve, Nora river, Gry-aschinskaya Mt., 25.08.2004, leg. Ryvkin A.B. (1 spec.); Amur region, Dichun near Radde, 15.08.1978, leg. Kurbatov S.A. (1 spec.); Russky Island, Rynda, 9–15.08.1978 (1 spec.); **Thailand**: Mae-HongSon prov., Pai, Mae Yen vill. env., h=560 m, 19.3633°N 98.4659°E, forest river, 15–24.12.2010, leg. Tomkovich K. (1 spec.).

DISTRIBUTION. Palearctic, Nearctic, Oriental. — Kazakhstan; Kyrgyzstan; Tajikistan; Uzbekistan; Mongolia; Russian Far East; new to Thailand; can be found in China.

Atomaria sodermani Sjoberg, 1947

MATERIAL. **Tajikistan**: Ramit, Kholmri, *Acer* forest, 20.05.1986; **Russia**: Primorye, Ussurijsk area, Kamenushka, 27–28.05.1984, leg. Nikitsky N.B. (1 spec.); the same data, 02.06.1990, leg. Kurbatov S.A. (1 spec.); Amur region, Mazanovsky area, Selemeja river, near Nora river, h=280 m, 11.08.2006, leg. Veselova E.M., Ryvkin A.B. (1 spec.); Amur region, Mazanovsky area, Selemeja river, near Aldicon river, 5.09.2004, leg. Ryvkin A.B. (5 spec.); Amur region, Zeya, 10–11.06.1978, leg. Belov V.V., Kurbatov S.A. (1 spec.); Lazovsky reserve, 17–19.05.1996, leg. Sundukov Yu.

(1 spec.); the same data, 23–31.05.2009, leg. Kurbatov S.A. (1 spec.); Kamtschatka, near Petropavlovsk-Kamtschatsky, Elisovo, 1.08.1990, leg. Saluk S. (1 spec.); Amur region, Dichun near Radde, 15.08.1978, leg. Kurbatov S.A. (1 spec.); the same data, 13.08.1978, leg. Belov V.V. (1 pec.); Amur region, Selemejinsky area, Norsky reserve, 8.07. 2005, leg. Ryvkin A.B., Veselova E.M. (1 spec.); Amur region, Selemejinsky area, Selemeja river basin, Aldikon river, near Norsk, litter under *Salix*, 5.09.2004, leg. Ryvkin A.B. (1 spec.); Shkotovsky region, near Anisimovka, 21.08.1977, leg. Krivolutz-kaya G.O. (1 spec.).

DISTRIBUTION. Europe, Siberia, Far East. — New to Tajikistan; Russian Far East; can be found in China.

Atomaria subangulata J. Sahlberg, 1926

MATERIAL. **Russia**: Primorye, Khabarovky region, Bureinsky reserve, Levaya Burea river, h=670 m, 2.07.2011, leg. Ryvkin A.B. (1 spec.); the same data, 25.06.2011; Ussurijsky region, Kamenushka, 12.05.1990, leg. Nikitsky N.B. (1 spec.).

DISTRIBUTION. Europe, Caucasus, Siberia, Nearctic. — New to Russian Far East; can be found in China.

Atomaria subapicalis Reitter, 1888

MATERIAL. **Russia**: Kuril Islands, Shikotan, Krabozavodsk, 17.08.1973, leg. Kerzhner I. (1 spec.).

DISTRIBUTION. E Siberia, Far East. — Russian Far East; can be found in China.

Atomaria testacea Stephens, 1830

MATERIAL. **Kazakhstan**: Dzungarian Alatau, Tastau river, Arkantirgen river, leaf litter, h=1800 m, 10.08.1991, leg. Tishechkin A.K. (10 spec.).

DISTRIBUTION. Palaearctic, Nearctic. — Kazakhstan, Mongolia; can be found in China.

Atomaria torrida C. Johnson, 1971

MATERIAL. **Nepal**: Panchthar distr., Panipora, h=2300 m, mixed broadleaved forest, 16–20.04.1988, leg. Martens J., Schawaller W. (6 spec.); Ilam distr., Mai Pokhari, *Castanopsis* forest remains, h=2100–2200 m, *Castanopsis* forest, 9–10.04.1988, leg. Martens J., Schawaller W. (9 spec.); Ilam Distr., Mai Pokhari, 2150–2250 m, 23–25.08.1983, leg. Martens J., Daams (1 spec.); Panchthar Distr., Sankhua Sabha Distr., Arun Valley between Mure and Hu-re, mixed broadleaved forest, 2050–2150 m, 9–17.06.1988, leg. Martens J., Schawaller W. (1 spec.) [Lyubarsky, 1999].

DISTRIBUTION. China: Taiwan; India: Sikkim, Bengal, Uttar Pradesh; Nepal; Japan.

Atomaria trapeziformis C. Johnson, 1970

MATERIAL. **Russia**: Tuva, Mongun-Taiginsky area, Shara-Kharagai, 06–08.1978, nest of Pallas's Pika (*Ochotona pallasi*), leg. Suntsova N. (20 spec.); Mongun-Taiginsky area, Shara-Kharagai, nest of *Alticola strelzowi*, 22.06.1978, leg. Suntsova N. (1 spec.).

DISTRIBUTION. E Siberia; Mongolia. — Can be found in China.

Atomaria tristis C. Johnson, 1971

MATERIAL. **India**: Himachal Pradesh, Simla Kufri, 16.07.1989, leg. Riedel A. (7 spec.); the same data, 16.04.1989, leg. Riedel A. (1 spec.) [Lyubarsky, 1997a].

DISTRIBUTION. China: Yunnan; India: Sikkim, Uttar Pradesh, Punjab, Himachal Pradesh; Nepal.

Atomaria turgida Erichson, 1946

MATERIAL. **China**: E Hubei, Shennongia Nat. Res., env. Macheng, Longsheng, h=500 m, litter, 29.V.1995, leg. S. Kurbatov (4 spec.) [Lyubarsky, 1997b]; **Russia**: Primorye, Ussurijsk area, Kamenushka, 7.07.1982, leg. Nikitsky N.B. (1 spec.); the same data, 28.06.1984, leg. Lyubarsky G.Yu. (1 spec.); the same data, 8–

28.06.1984, leg. Nikitsky N.B. (11 spec.); the same data, 14.07.1984, leg. Nikitsky N.B. (1 spec.); the same data, 14.07.1984, leg. Churkin S. (1 spec.); the same data, 26.05.1990, leg. Nikitsky N.B. (2 spec.); Ussurijsky reserve, Lomasina Pad, 28.07.1982, leg. Nikitsky (1 spec.); Ussurijsky reserve, 14.06.1967, leg. Tikhomirova A. (1 spec.); the same data, 7–27.05.1967, leg. Tikhomirova A. (13 spec.); Amur region, Selemjinsky area, Norsky reserve, Nora river, h=250 m, 26.09.2008, leg. Veselova E.M., Ryvkin A.B. (1 spec.); Lasovsky reserve, Prostochnaya bay, 1–7.07.2006, leg. Sundukov Yu. (1 spec.); Lasovsky reserve, 23–31.05.2009, leg. Kurbatov S.A. (4 spec.); Sikhote-Alin, Sibichi, 14.06.1951 (7 spec.); Khabarovsk region, Verkhnebureinsky area, Ust-Urgal, 29.08.2009, leg. Ryvkin A.B. (1 spec.); Amur region, Dichun near Radde, 4–6.06.1980, leg. Belov V.V. (1 spec.); Ussuri river basin, Bikinsky area, Birske, 8.06.1958, leg. Kabakov O.N. (1 spec.); **N Korea** [Lyubarsky, 1991].

DISTRIBUTION. Europe, Caucasus, Siberia, Far East. — China: Hubei; Japan; Russian Far East; N Korea.

Atomaria umbrina Gyllenhal, 1827

MATERIAL. **Russia:** Primorye, Amur region, Zeya reserve, 7.07.1978, leg. Kurbatov S.A. (1 spec.); Amur region, Dichun near Radde, 4–6.06.1980, leg. Belov V.V. (1 spec.).

DISTRIBUTION. Europe, Caucasus, Far East. — China: Heilongjiang; Russian Far East.

Atomaria vespertina Maklin, 1853

MATERIAL. **Nepal:** Panchthar Distr., Panipora, 2300 m, mixed broadleaved forest, 16–20.04.1988, leg. Martens J., Schawaller W. (1 spec.) [Lyubarsky, 1999]; **Russia:** Primorye, Amur region, Dichun near Radde, 6–8.06.1980, leg. Belov V.V. (1 spec.); Zeya, 6.06.1978, leg. Kurbatov S.A. (1 spec.); Amur region, Selemja river, 30 km upstream Fevralsk, 21.05.1983, leg. Cherezova (1 spec.); Sikhote-Alin Ridge, 15 km N Taiga camp, 23.06.1971, leg. Senchilina (1 spec.); Sikhote-Alin Ridge, upper river Yolzykhe, 26.06., leg. Formosov (1 spec.); Sikhote-Alin Ridge, Tordoki Mt., h=1400 m, 1.07., leg. Lafer G.Sh. (1 spec.); Khabarovsk region, Bureinsky reserve, Levaya Burea river basin, upstream mouth of Ynganakh river, litter, 6.07.2011, leg. Ryvkin A.B. (1 spec.); the same data, h=750–850 m, 30.06.2011; the same data, h=650 m, 25.06.2011; Komsomolsk-na-Amure, 15.06.1937, coll. Fursov N. (1 spec.); Ussurijsky area, Kamenushka, 12.05.1990, leg. Nikitsky N.B. (1 spec.); Tuva, Mongun-Taiginsky area, Shara-Kharagai tract, 11.06.1977, nest of Pallas's Pika (*Ochotona pallasi*), leg. Suntsova N. (3 spec.); the same data, Semigorki tract, 4.04.1977 (1 spec.).

DISTRIBUTION. Palaearctic, Nearctic. — India: Uttar Pradesh; Nepal; Mongolia; Russian Far East; Japan; can be found in China.

Atomaria wollastoni Sharp, 1867

MATERIAL. **Russia:** Primorye, Amur region, Selemjinsk district, Norski reserve, Nore river down of Maltsevsky Cordon, moss and litter among *Carex* spp.; cereals at lake bank, 10.06.2005, leg. Ryvkin A.B., Veselova E. (1 spec.); Ussuri district, Kamenushka, 23.06.1989, leg. Nikitsky N. (1 spec.); the same data, 23.06.1989; Lasovsky reserve, 16–19.07.2005, leg. Sundukov Yu., Shohrin V. (1 spec.).

DISTRIBUTION. Europe, Nearctic. — Russian Far East; can be found in China.

Atomaria zetterstedti (Zetterstedt, 1838)

MATERIAL. **Kazakhstan:** Dzungarian Alatau, Tastau river, Arkantirgen river, leaf litter, h=1800 m, 10.08.1991, leg. Tishechkin A.K. (1 spec.); **Uzbekistan:** Samarkand, 14.07.1940 (1 spec.); **Russia:** Primorye, Khabarovsk region, Okhotsky area, mouth Amka river, 7.08.1987, leg. Zherikhin V.V. (1 spec.); Amur region, Dichun near Radde, 10.08.1978, leg. Belov V.V. (1 spec.); Sikhote-Alin Ridge, Tutikhe, 7.07.1915, leg. Rymsky-Korsakov (1 spec.); Sikhote-Alin Ridge, Sedanka, 25.05.1915, leg. Rymsky-Korsakov (2 spec.); Djigitovka river, Sikhote-Alin reserve, in tinger fungus, 21.06.1979, leg. Lafer G.Sh. (1 spec.).

DISTRIBUTION. Europe, Caucasus, Siberia. — Kazakhstan; Uzbekistan; Russian Far East; can be found in China.

Atomaroides Lyubarsky, 1989

Atomaroides ussurica Lyubarsky, 1987

MATERIAL. **China:** C Sichuan, Wolong Reserve, h=500–1700 m, 15–24.05.1994, leg. Kurbatov S.A. (2 spec.) [Lyubarsky, 1995]; **Russia:** Primorye, Ussurijsky area, Kamenushka, 6–7.1984, leg. Nikitsky N.B. (24 spec.); Lasovsky reserve, 3.06.2007, leg. Sundukov Yu. (1 spec.); Lasovsky reserve, 14–31.05.2009, leg. Kurbatov S.A. (8 spec.); Vladivostok, 12.06.1978, leg. Berlov (3 spec.); Markushevka, 30 km S of Spassk-Dalniy, 17.06.1990, leg. Kurbatov S.A. (1 spec.); Amur region, Dichun near Radde, 4–6.06.1980, leg. Belov V.V. (1 spec.).

DISTRIBUTION. China: C Sichuan; Russian Far East.

Curelius Casey, 1900

Curelius dilutus Reitter, 1883

MATERIAL. **Turkmenistan:** Ashgabat, 9–13.04.1984, leg. Mikheev (2 spec.) [Lyubarsky, 2008]; **Uzbekistan:** Tashkent, 11.04.1985 (1 spec.); Samarkand, leg. Maly (1 spec.); Yangiul, 40 km WSW Tashkent, 13–16.04.1984, leg. Kurbatov S.A. (1 spec.); Abai, 30 km WNW Tashkent, 17.04.1984, leg. Kurbatov S.A. (5 spec.); **Tajikistan:** Hissar ridge, Kondara gorge, 16–21.06, leg. Yanushev V. (2 spec.); Panj, 7–8.1988, leg. Kolyada V. (2 spec.); Khatlon Province, Yavan, Goraz, 8.06, leg. Yanushev V. (1 spec.); Qurghonteppa Oblast, Kurgan-Tyube, saline land, 8.05.1964, leg. Valiachmedov (5 spec.); Hissar ridge, Kondara gorge, 4.08.1969, leg. Yanushev V. (2 spec.); Dushanbe, 5.07.1962, leg. Bogachev A. (3 spec.) [Lyubarsky, 2008].

DISTRIBUTION. Caucasus, C Asia. — Kazakhstan; Kyrgyzstan; Turkmenistan; Uzbekistan; Tajikistan; can be found in China.

Curelius japonicus Reitter, 1878

MATERIAL. **India:** Goa, Bendurdem, on light, 1–4.03.2009, leg. Tomkovich K. (2 spec.); **Nepal:** Dhading Distr., W Samari Banjyang/Topal Khola, 1000 m, forest remains, 23.VII.1983, leg. Martens J., Schawaller W. (1 spec.); Ilam Distr., N Mai Pokhari, Tai Gitang Khola, 2500–2600 m, 18–31.III.1980, leg. Martens J., Ausobsky (1 spec.); Ilam Distr., Mai Pokhari, 2100–2200 m, 25–27.III.1980, leg. Martens J., Ausobsky (1 spec.) [Lyubarsky, 1999]; **N Korea:** Pyongyang City (12 spec.); North Hwanghae Province (2 spec.) [Lyubarsky, 1991]; **Vietnam:** NNE Ho Chi Min, env. Cat Tien vill., 5–10.07.1995, leg. Napolov A. (12 spec.); Ha Noi, in light, 14–15.04.2009, leg. Lastukhin A. (25 spec.).

DISTRIBUTION. Palaearctic, Afrotopical, Nearctic, Neotropical, Oriental Region. — China: Beijing, Heilongjiang, Hongkong, Hubei, Jiangsu, Sichuan; India: Goa, Sikkim, Uttar Pradesh; Nepal; Bhutan; Japan; N Korea; Vietnam.

Ephistemus Stephens, 1829

Ephistemus globulus Paykull, 1798

MATERIAL. **Russia:** Primorye, near Vladivostok, near Sputnik, in rotten hay, 14.08.1988, leg. Kurbatov S.A. (2 spec.).

DISTRIBUTION. Palaearctic, Nearctic, Australian. — China: Heilongjiang; Kazakhstan; Mongolia; Russian Far East.

Ephistemus splendens Johnson, 1971

MATERIAL. **Nepal:** Sankhua Sabha Distr., Arun valley, Chichila, *Quercus* forest, bushes near village, 18–20.06.1988, leg. Martens J., Schawaller W. (2 spec.); Gorkha Distr., Darondi Khola, between Naya Sangu and Gorkha, 1200 m, 14.08.1983, leg. Martens J., Schawaller W. (1 spec.); Kathmandu valley, Mt. Sheopuri, *Quercus semecarpifolia* forest, 2100–2300 m, 25.06.1988, leg. Martens J., Schawaller W. (1 spec.) [Lyubarsky, 1999].

DISTRIBUTION. SE Palaearctic, Oriental. — China: Guandong, Yunnan; India: Sikkim, Uttar Pradesh; Nepal. Oriental Region: India: Manipur.
