KEY WORDS: Diptera, Sepsidae, Afrotropical Region, new species, new records.

КЛЮЧЕВЫЕ СЛОВА: Diptera, Sepsidae, Афротропическая область, новые виды, новые данные по распространению.

ABSTRACT. The results of the determination of Sepsidae materials from Afrotropical Region from collections of Czech University of Life Sciences Prague, Czech Republic, Tel Aviv University, Israel and The National Museum, Bloemfontein, Republic of South Africa are presented. 46 species from 13 genera were studied, general distributions for each species are provided. New records of the following species are given: *Adriapontia freidbergi* Ozerov, 2000 (Malawi); *Afrosepsis camerounica* Ozerov, 1996 (Togo); *Brachythoracosepsis butikensis* (Vanschuytbroeck, 1963) (Burundi, Malawi); *B. freidbergi* Ozerov, 1996 (Democratic Republic of the Congo); *B. nodosa* (Walker, 1849) (Togo); *B. saothomensis* Ozerov, 2000 (Democratic Republic of the Congo); *Dicranosepsis takoenensis* (Vanschuytbroeck, 1963) (Benin, Togo); *Diploosmeteriosepsis pilifemur* (Munari, 1994) (Togo); *Leptomerosepsis improvisa* Ozerov, 1996 (Burundi); *Paratoxopoda akuminambili* Vanschuytbroeck, 1961 (Central African Republic); *P. pilifemorata* Soós, 1964 (Republic of South Africa); *P. similis* Ozerov, 1993 (Central African Republic, Nigeria, Togo); *Saltella bezzii* (Duda, 1926) (Central African Republic, Ethiopia); *Sepsis arotrolabis* Duda, 1926 (Malawi); *Sepsis delectabilis* Adams, 1905 (Burundi, Togo); *S. dissimilis* Brunetti, 1910 (Cameroon); *S. femoriseta* Duda, 1926 (Cameroon); *S. holaethiops* Speiser, 1924 (Burundi); *S. igniventris* Thomson, 1869 (Benin, Burundi, Central African Republic); *S. lateralis* Wiedemann, 1830 (Benin, Burundi, Togo); *S. luteola* Ozerov, 2004 (Cameroon); *S. oligochaeta* Soós, 1962 (Cameroon); *S. petulantis* Adams, 1905 (Central African Republic, Togo); *S. thoracica* Robineau-Desvoidy, 1830 (Burundi, Cameroon, Central African Republic); *Toxopoda bequaerti* (Curran, 1929) (Burundi, Central African Re-

public); *T. nitida* Macquart, 1851 (Cameroon); *T. soror* (Munari, 1994) (Central African Republic). In addition, four new species are described: *Meroplus burundi* sp.n. (Burundi), *M. zimbabweensis* sp.n. (Zimbabwe), *Paratoxopoda mystacea* sp.n. (Central African Republic), and *Toxopoda haladai* sp.n. (Central African Republic).

РЕЗЮМЕ. Представлены результаты определения материалов двукрылых семейства Sepsidae из Афротропического региона из коллекций Чешского аграрного университета в Праге, Чехия, университета Тель-Авива, Израиль и Национального музея в Блумфонтейне, Южно-Африканская Республика. 41 вид из 13 родов были изучены, суммированы данные о распространении каждого вида. Приведены новые данные о распространении следующих видов: *Adriapontia freidbergi* Ozerov, 2000 (Малави); *Afrosepsis camerounica* Ozerov, 1996 (Того); *Brachythoracosepsis butikensis* (Vanschuytbroeck, 1963) (Бурунди, Малави); *B. freidbergi* Ozerov, 1996 (Демократическая Республика Конго); *B. nodosa* (Walker, 1849) (Того); *B. saothomensis* Ozerov, 2000 (Демократическая Республика Конго); *Dicranosepsis takoenensis* (Vanschuytbroeck, 1963) (Бенин, Того); *Diploosmeteriosepsis pilifemur* (Munari, 1994) (Того); *Leptomerosepsis improvisa* Ozerov, 1996 (Бурунди); *Paratoxopoda akuminambili* Vanschuytbroeck, 1961 (Центральноафриканская Республика); *P. pilifemorata* Soós, 1964 (Южно-Африканская Республика); *P. similis* Ozerov, 1993 (Нигерия, Того, Центральноафриканская Республика); *Saltella bezzii* (Duda, 1926) (Центральноафриканская Республика, Эфиопия); *Sepsis arotrolabis* Duda, 1926 (Малави); *S. delectabilis* Adams, 1905 (Бурунди, Того); *S. dissimilis* Brunetti,

1910 (Камерун); *S. femoriseta* Duda, 1926 (Камерун); *S. holaeliops* Speiser, 1924 (Бурунди); *S. igniventris* Thomson, 1869 (Бенин, Бурунди, Центральноафриканская Республика); *S. lateralis* Wiedemann, 1830 (Бенин, Бурунди, Того); *S. luteola* Ozerov, 2004 (Камерун); *S. oligochaeta* Soós, 1962 (Камерун); *S. petulantis* Adams, 1905 (Того, Центральноафриканская Республика); *S. thoracica* Robineau-Desvoidy, 1830 (Бурунди, Камерун, Центральноафриканская Республика); *Toxopoda bequaerti* (Curran, 1929) (Бурунди, Центральноафриканская Республика); *T. nitida* Macquart, 1851 (Камерун); *T. soror* (Munari, 1994) (Центральноафриканская Республика). В дополнение, четыре новых для науки вида описаны: *Meroplius burundi* sp.n. (Бурунди), *Meroplius zimbabwensis* sp.n. (Зимбабве), *Paratoxopoda mystacea* sp.n. (Центральноафриканская Республика) и *Toxopoda haladai* sp.n. (Центральноафриканская Республика).

Introduction

Sepsidae are small- or medium-sized (body length: 2–12 mm) black, rarely grey, or yellow acalyprate flies, many of which superficially resemble winged ants, and are easily distinguished from other families, except the Neotropical family Rhopalomeridae, by the presence of one or more setae situated below the posterior thoracic spiracle.

More than 120 species in 18 genera occur in the Afrotropical Region [Ozerov, 2005, 2006, 2010, 2011], but the sepsid fauna of the majority of African countries has remained completely unknown till now.

The present work is based on the materials of Sepsidae from Czech University of Life Sciences Prague (CULS), Tel Aviv University, Israel (TAU) and The National Museum, Bloemfontein, Republic of South Africa (NMB). This paper represents the additional contribution to the study of the Afrotropical Sepsidae fauna. 46 species from 13 genera were studied, 27 species are recorded firstly for some countries. The terminology used for the description of new species follows McAlpine [1981], Cumming et al. [2009], and Stuckenbergh [1999].

The following abbreviations are used: RSA — Republic of South Africa, D.R. Congo — Democratic Republic of the Congo; ZMUM — Zoological Museum, Moscow State University, Moscow, Russia.

Taxonomic part

Adriapontia capensis (Hennig, 1960)

MATERIAL. RSA, Eastern Cape, Hogsback, Never Daunted, 32°35.725'S 26°55.873'E, 28–29.III.2011, 1138 m, A.H. Kirk-Spriggs, malaise traps, indigenous Afromontane forest (3 ♂♂, 2 ♀♀, NMB); Eastern Cape, Hogsback, Redwood trail, 32°35.337'S 26°56.135'E, 26.III.2011, 1169 m, A.H. Kirk-Spriggs, sweeping forest paths and glades (1 ♀, NMB); Western Cape, Keurbos forest, 33°54.435'S 23°43.714'E, 28–30.III.2009, 500 m, A.H. Kirk-Spriggs & S. Otto, sweeping indigenous montane forest (4 ♂♂, 5 ♀♀, NMB); KZN, Royal Natal N.P., Thendele, 28°42.378'S 28°56.083'E, 15–17.II.2010, 1600 m, A.H. Kirk-Spriggs, malaise traps, *Leucosidea* dominated scrub (3 ♀♀, NMB).

DISTRIBUTION. Republic of South Africa.

Adriapontia freidbergi Ozerov, 2000

MATERIAL. Malawi, Zomba Plateau Trout Farm, 15°21.4'S 35°18.1'E, 1477 m, 5 and 10.I.2010, A. Freidberg (8 ♂♂, TAU, ZMUM); Nyika National Park, Zovo Chipolo Forest, 10°34.5'S 33°42.4'E, 2189 m, 28–31.XII.2009, A. Freidberg (1 ♂, TAU); Viphya Mts., Chikangawa, 11°50.5'S 33°48.2'E, 1707 m, 26.XII.2009, A. Freidberg (1 ♂, TAU).

DISTRIBUTION. Malawi (**first record**), Tanzania.

Afromeroplus semlikiensis (Vanschuytbroeck, 1963)

MATERIAL. Kenya, Rift Valley Prov., Mpala Research Station at: 00°17.635'S 36°53.947'E, 17–18.IV.2011, 1792 m, A.H. & M.K. Kirk-Spriggs, malaise traps, dry *Acacia* savanna (2 ♂♂, NMB).

DISTRIBUTION. Democratic Republic of the Congo, Kenya, Namibia.

Afrosepsis camerounica Ozerov, 1996

MATERIAL. Togo, Kloto waterfall, 6°57'N 0°36'E, 336 m, 22.I.2011, A. Freidberg (1 ♂, TAU).

DISTRIBUTION. Cameroon, Togo (**first record**).

Australosepsis niveipennis (Becker, 1903)

MATERIAL. Cameroon, Far-North Reg., Mayo-Tsanga, Modge-Kama, 10°32.598'N 13°35.027'E, 7.VIII.2013, 1056 m, A.H. Kirk-Spriggs, sweeping domestic donkey dung (1 ♂, 1 ♀, NMB); North Reg., Vina, Tchabal village at: (1) 07°36.803'N 13°32.622'E, 12.VIII.2013, 1270 m, A.H. Kirk-Spriggs, sweeping in deep shade (1 ♀, NMB); North Reg., Mayo-Louti, Bossom at: (2) 09°55.233'N 13°46.645'E, 6.VIII.2013, 475 m, A.H. Kirk-Spriggs, sweeping understory vegetation in deep shade (1 ♀, NMB); Ethiopia, 45 km NE Arba Minch, 6°17'N 37°47'E, 1200 m, 10.V.2015, J. Halada (1 ♀, CULS); Kenya, Mt. Kenya, Castle Forest, 0°25'S 37°19'E, 1920 m, 12.II.2011, A. Freidberg (1 ♂, TAU); Gilgil, 0°33'S 36°21'E, 1980 m, 9.II.2011, A. Freidberg (15 ♂♂, 2 ♀♀, TAU); Rift Valley Prov., Mpala Research Station at: 00°17.635'S 36°53.947'E, 17–18.IV.2011, 1792 m, A.H. & M.K. Kirk-Spriggs, malaise traps, dry *Acacia* savanna (1 ♂, 1 ♀, NMB); Malawi, Salima, 10 km E, Rt.S122, 13°46.1'S 34°33.2'E, 494 m, 4.I.2010, on acacia, A. Freidberg (2 ♂♂, TAU); Lake Chilwa, Kachulu, Rt. S143, 15°22.3'S 35°35.4'E, 657 m, 6.I.2010, A. Freidberg (1 ♂, TAU); Namibia, Katima Mulilo Dist., Mavunje campsite at: 17°55.141'S 23°19.073'E, 22–26.XI.2012, 945 m, A.H. Kirk-Spriggs, malaise traps, Kwando River floodplain (2 ♀♀, NMB); prov. Erongo, 28 km S of Karibib, 22°11.64S 15°51.24E, 1150 m, 28.III.2017, J. Halada (1 ♂, CULS); Nige-ria, Gashaka Gumfi NP, 30 km SE Senti, 7°21'N 11°32'E, 380–560 m, 24.IV.–8.V.2011, J. Halada (2 ♂♂, 1 ♀, CULS); 28 km SEE Abuja, 09°06'N 07°45'E, 400 m, 14.IV.2011, J. Halada (1 ♂, 1 ♀, CULS); Togo, Kloto, Kouma Tokoli, 6°58'N 0°35'E, 530 m, 20.I.2011, A. Freidberg (1 ♀, TAU).

DISTRIBUTION. Angola, Botswana, Cameroon, Ethiopia, Ghana, Kenya, Madagascar, Malawi, Namibia, Nigeria, Republic of the Congo, Republic of South Africa, Sierra Leone, Sudan, Swaziland, Tanzania, Togo, Uganda, Zimbabwe. — Australasian/Oceanian, Oriental, Palaearctic.

Brachythoracosepsis butikensis (Vanschuytbroeck, 1963)

MATERIAL. Burundi, Bururi Province, Bururi Nat. Res. cloud forest, 3°56'S 29°37'E, 2200 m, 2.II.2011, A. Freidberg (1 ♂, TAU); Malawi, Zomba Plateau, South Water Board Cottage,

15°21.5'S 35°18.3'E, 1471 m, 5.I.2010, A. Freidberg (1 ♂, 1 ♀, TAU); Zomba Plateau Trout Farm, 15°21.4'S 35°18.1'E, 1477 m, 10.I.2010, A. Freidberg (1 ♂, TAU); **Kenya**, Central Prov., Katura forest, Nairobi at: 01°14.504'S 36°49.452'E, 23.IV.2011, 1720 m, A.H. Kirk-Spriggs, sweeping in shaded mixed upland indigenous forest (1 ♂, NMB).

DISTRIBUTION. Burundi (**first record**), Cameroon, Democratic Republic of the Congo, Ethiopia, Ghana, Malawi (**first record**), Kenya, Nigeria, Republic of South Africa, Tanzania, Zambia, Zimbabwe.

Brachythoracosepsis freidbergi Ozerov, 1996

MATERIAL. **D.R. Congo**, Oriental Province, Likombo forest, 2 km SW Bomane, 1.28349°N 23.72358°E, 20–22.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen primary forest (disturbed), Boyekoli Ebale Congo Expedition 2010 (1 ♂, NMB); Oriental Province, Yafira forest transect, 00.69594°N 24.20107°E, 29–31.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen swamp forest, Boyekoli Ebale Congo Expedition 2010 (1 ♂, NMB); Oriental Province, Yafira forest transect, 00.70216°N 24.20060°E, 29–31.V.2010, A.H. Kirk-Spriggs, malaise traps, secondary lowland evergreen forest, Boyekoli Ebale Congo Expedition 2010 (1 ♂, NMB).

DISTRIBUTION. Democratic Republic of the Congo (**first record**), Cameroon, Kenya.

Brachythoracosepsis nodosa (Walker, 1849)

MATERIAL. **Cameroon**, Northwest Reg., Mezam, Bafut village at: 06°05.026'N 10°07.442'E, 17–19.VIII.2013, 1060 m, A.H. Kirk-Spriggs, malaise traps, cultivated plots & degraded forest (1 ♀, NMB); **D.R. Congo**, Oriental Province, Bomane village area at: 01°16283'N 23°43.994'E, 20–24.V.2010, A.H. Kirk-Spriggs, sweeping bush paths & village environs, Boyekoli Ebale Congo Expedition 2010 (1 ♂, 3 ♀♀, NMB); Oriental Province, Bomane village area at: 01°16283'N 23°43.994'E, 20–24.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen secondary forest, Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB); Oriental Province, Likombo forest, 2 km SW Bomane, 1.28349°N 23.72358°E, 20–22.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen primary forest (disturbed), Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB); **Malawi**, Zomba Plateau Trout Farm, 15°21.4'S 35°18.1'E, 1477 m, 10.I.2010, A. Freidberg (1 ♀, TAU); **Togo**, Kloto Agome-Yoh, 6°57'N 0°36'E, 333 m, 21.I.2011, A. Freidberg (1 ♀, TAU).

DISTRIBUTION. Cameroon, Comoros, Democratic Republic of the Congo, Ethiopia, Guinea, Ivory Coast, Kenya, Madagascar, Malawi, Nigeria, Republic of South Africa, São Tomé and Príncipe, Sierra Leone, Tanzania, Togo (**first record**), Uganda.

Brachythoracosepsis ruanoliensis (Vanschuytbroeck, 1963)

MATERIAL. **D.R. Congo**, Oriental Province, Bomane village area at: 01°16283'N 23°43.994'E, 20–24.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen secondary forest, Boyekoli Ebale Congo Expedition 2010 (1 ♂, 1 ♀, NMB); Oriental Province, Bomane village area at: 01°16283'N 23°43.994'E, 20–24.V.2010, A.H. Kirk-Spriggs, sweeping bush paths & village environs, Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB); Oriental Province, Likombo forest, 2 km SW Bomane, 1.28349°N 23.72358°E, 20–22.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen primary forest (disturbed), Boyekoli Ebale Congo Expedition 2010 (1 ♂, 2 ♀♀, NMB); Oriental Province, Yafira forest transect, 00.70216°N 24.20060°E, 29–31.V.2010, A.H. Kirk-Spriggs, malaise traps, secondary lowland evergreen forest, Boyekoli Ebale Congo Expedition 2010 (2 ♂♂, 1 ♀, NMB); Oriental

Province, Lieki village, 1 km S at: 00°41.483'N 24°14.271'E, 27–28.V.2010, A.H. Kirk-Spriggs, hanging trap, bailed feces secondary forest, Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB); Oriental Province, Eyolo forest, ca 2 km E Lieki, 0.69642°N 24.24186°E, 25–29.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen swamp forest, Boyekoli Ebale Congo Expedition 2010 (6 ♂♂, 3 ♀♀, NMB); Oriental Province, Yafira forest transect, 00.70269°N 24.20080°E, 29–31.V.2010, A.H. Kirk-Spriggs, malaise traps, primary lowland evergreen forest, Boyekoli Ebale Congo Expedition 2010 (1 ♂, NMB); Oriental Province, Yafira forest transect, 00.69594°N 24.20107°E, 29–31.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen swamp forest, Boyekoli Ebale Congo Expedition 2010 (1 ♂, NMB).

DISTRIBUTION. Cameroon, Democratic Republic of the Congo, Kenya, Nigeria, Sierra Leone, Uganda.

Brachythoracosepsis saothomensis Ozerov, 2000

MATERIAL. **D.R. Congo**, Oriental Province, Yafira forest transect, 00.70269°N 24.20080°E, 29–31.V.2010, A.H. Kirk-Spriggs, malaise traps, primary lowland evergreen forest, Boyekoli Ebale Congo Expedition 2010 (1 ♂, NMB);

DISTRIBUTION. Democratic Republic of the Congo (**first record**), São Tomé and Príncipe.

Dicranosepsis takoensis (Vanschuytbroeck, 1963)

MATERIAL. **Benin**, Amanhoue, Gohome, Djakotomey, 6°50'N 1°46'E, 53 m, 15.I.2011, A. Freidberg (7 ♂♂, 1 ♀, TAU); Cameroon, Northwest Reg., Menoua, Université Dschang, 05°26.761'N 10°04.237'E, 16.VIII.2013, 1402 m, A.H. Kirk-Spriggs, sweeping cultivated plots & banana groves (2 ♂♂, 1 ♀, NMB); **D.R. Congo**, Oriental Province, Lieki village area at: 00°41.117'N 24°14.362'E, 25.V.–4.VI.2010, A.H. Kirk-Spriggs, malaise traps, bush paths & village environs, Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB); Oriental Province, Bomane village area at: 01°16283'N 23°43.994'E, 20–24.V.2010, A.H. Kirk-Spriggs, sweeping bush paths & village environs, Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB); **Togo**, Kloto, Kouma Konda, 6°57'N 0°35'E, 620 m, 20–22.I.2011, A. Freidberg (4 ♂♂, TAU).

DISTRIBUTION. Angola, Benin (**first record**), Cameroon, Comoros, Democratic Republic of the Congo, Ethiopia, Guinea, Kenya, Nigeria, Republic of the Congo, Togo (**first record**), Uganda.

Diploosmeteriosepsis pilifemur (Munari, 1994)

MATERIAL. **Togo**, Kloto, Kouma Tokoli, 6°58'N 0°35'E, 530 m, 20.I.2011, A. Freidberg (1 ♀, TAU)

DISTRIBUTION. Nigeria, Sierra Leone, Togo (**first record**).

Leptomerosepsis improvisa Ozerov, 1996

MATERIAL. **Burundi**, Bururi Province, Siguvuyaye gallery forest, 3°58'S 29°37'E, 1790 m, 2.II.2011, A. Freidberg (2 ♂♂, TAU); **Cameroon**, North Reg., Vina, Tchabal village at: (1) 07°36.803'N 13°32.622'E, 12.VIII.2013, 1270 m, A.H. Kirk-Spriggs, sweeping in deep shade (7 ♀♀, NMB).

DISTRIBUTION. Burundi (**first record**), Cameroon, Kenya, Uganda.

Leptomerosepsis simplicicrus (Duda, 1926)

MATERIAL. **Cameroon**, Northwest Reg., Menoua, Université Dschang, 05°26.761'N 10°04.237'E, 16.VIII.2013, 1402 m, A.H. Kirk-Spriggs, sweeping cultivated plots & banana groves (1 ♀, NMB); **D.R. Congo**, Oriental Province, Bomane village area at:

01°16'28.3"N 23°43.994"E, 20–24.V.2010, A.H. Kirk-Spriggs, malaise traps, lowland evergreen secondary forest, Boyekoli Ebale Congo Expedition 2010 (1 ♀, NMB).

DISTRIBUTION. Cameroon, Democratic Republic of the Congo, Ethiopia, Kenya, Nigeria, Uganda.

Meroplius burundi sp.n.

Figs 1–4.

MATERIAL. Holotype ♂, **Burundi**, Kayanza Prov., Park National de la Kabira, Rwegura Sector, 02°55.320'S 29°30.067'E, 21–26.XI.2010, 2237 m, A.H. Kirk-Spriggs, malaise traps, indigenous Afromontane forest (NMB).

DESCRIPTION. MALE. Body length 4.5 mm; wing length 4.2 mm. *Head* and eye in lateral view roundish. Frons black, subshining. Facial carina yellowish; antennal grooves blackish. Gena black; height of gena below eye approximately 1/7 times as long as vertical diameter of eye. Clypeus black. Postcranium black, delicately greyish dusted. 1 small orbital, 1 ocellar, 1 divergent postocellar, 1 inner vertical, 1 outer vertical setae present. Antenna yellowish, but postpedicel darkened from outside. Postpedicel about 1.5 times longer than wide. One small vibrissa present.

Thorax black. Scutum delicately greyish dusted; 1 postpronotal, 2 notopleural, 0+1 supra-alar, 1 postalar, 0+1 dorsocentral setae present. Proepisternum greyish dusted. Proepimeron and anepisternum shining. Katepisternum shining, with densely greyish dusted stripe along upper margin. Anepimeron, katepimeron and metepimeron shining. Meron, metepisternum, katatergite and anatergite delicately greyish dusted. Mediotergite delicately greyish dusted, but shining under scutellum. Postmetacoxal bridge absent. Scutellum greyish dusted, with a pair of long apical setae and a pair of basal setulae.

Legs. Fore coxa and tibia yellow, fore femur darkened, mid and hind femora black, but yellow basally, mid and hind tibiae black, all tarsi blackish, only tarsomere 1 of fore tarsus yellowish. Fore femur and tibia as in Fig. 1. Mid coxa bare. Mid tibia without setae, except apicals. Hind tibia with good visible osmeterium in basal half anterodorsally and with small preapical dorsal seta.

Wing clear, only basal-costal cell darkened; veins brown. Calypters whitish; margin of upper calypter white, margin of lower calypter darkened. Halter whitish. Alula entirely covered with microtrichia.

Abdomen black, shining. Sternite 4 as in Fig. 2. Surstyli stick-like, curved basally (Fig. 4).

FEMALE unknown.

COMPARISON. The new species is close to *Meroplius cordyllophorus* Hennig, 1954 by structure of foreleg (Fig. 9) and by structure of male surstyli, but surstyli of *M. cordyllophorus* are broadening apically and with more or less long hairs at apex (Fig. 10).

DISTRIBUTION. Burundi.

Meroplius zimbabweensis sp.n.

Figs 5–8.

MATERIAL. Holotype ♂, **Zimbabwe**, 60 km NNW Bulawayo, 19°41'N 28°21'E, 1200 m, 18–19.XII.2011, J. Halada (CULS). Paratypes 5 ♂♂, same labels as holotype (CULS, ZMUM).

DESCRIPTION. MALE. Body length 2.5–3.1 mm; wing length 2.0–2.5 mm. *Head* in lateral view slightly flattened dorsoventrally. Eye in lateral view roundish. Frons black, subshining. Facial carina brown; antennal grooves brown or blackish. Gena black; height of gena below eye approximately 1/5 times as long as vertical diameter of eye. Clypeus black. Postcranium black, greyish dusted. 1 small orbital, 1 ocellar, 1 divergent postocellar, 1 inner vertical, 1 outer vertical setae present. Antenna from yellow to dark brown. Postpedicel in profile oval, slightly longer than wide. One small vibrissa present.

Thorax black. Scutum delicately greyish dusted; 1 postpronotal, 2 notopleural, 0+1 supra-alar, 1 postalar, 0+1 dorsocentral setae present. Proepisternum greyish dusted. Proepimeron and anepisternum shining. Katepisternum shining, with densely greyish dusted stripe along upper margin. Anepimeron, katepimeron, meron, metepisternum, and metepimeron shining. Katatergite and anatergite delicately greyish dusted. Mediotergite greyish dusted, but shining under scutellum. Postmetacoxal bridge absent. Scutellum delicately greyish dusted, with a pair of long apical setae and a pair of basal setulae.

Legs. Fore coxa, fore femur and tibia yellow, mid femur and tibia black, hind femur black, but yellow basally, hind tibia black, all tarsi yellow in ground colour, but tarsomeres 3–5 blackish. Fore femur and tibia as in Fig. 5. Mid coxa bare. Mid tibia with one anteroventral seta in apical third, also with a ring of apical setae. Hind tibia with good visible osmeterium in basal half anterodorsally and with short preapical dorsal seta.

Wing clear, only basal-costal cell darkened; veins brown. Calypters whitish; margin of upper calypter white, margin of lower calypter darkened. Halter whitish. Alula entirely covered with microtrichia.

Abdomen black, shining. Sternites 4 and 5 as in Fig. 6. Surstyli short, broadened apically (Figs 7, 8).

FEMALE unknown.

COMPARISON. The new species is close to *Meroplius zambianus* Ozerov, 2011 by structure of male surstyli, but surstyli of *M. zimbabweensis* is shorter, not broadening medially inside as in Figs 12 and 13, but broadening apically (Fig. 8). The new species differs also by the structure of male sternite 4 (Fig. 6 and Fig. 11).

DISTRIBUTION. Zimbabwe.

DISTRIBUTION. Angola, Botswana, Democratic Republic of the Congo, Ethiopia, Ivory Coast, Kenya, Malawi, Namibia, Republic of South Africa, Sierra Leone, Tanzania, Zimbabwe.

Paratoxopoda mystacea sp.n.

Figs 17–19.

MATERIAL. Holotype ♂, Central African Republic, 60 km W Bouar, 05°45'N 15°13'E, 660 m, 23.III.2010, J. Halada (1 ♂, CULS); Paratype ♂, same label as holotype (ZMUM).

DESCRIPTION. MALE. Body length 5.2–5.9 mm; wing length 3.2–3.6 mm. **Head.** Frons black, subshining. Face and gena dark brown. Genal width less than width of postpedicel. Postcranium black, delicately greyish dusted. 1 small orbital, 1 ocellar, 1 divergent postocellar, 1 inner vertical setae present. Vibrissal angle with numerous short setae (Fig. 19). Antenna black. Postpedicel about 2 times as long as wide.

Thorax black, with hardly noticeable dark blue tinge. 2 notopleural, 0+1 supra-alar, 1 postalar, 0+1 dorso-central setae present. Proepisternum with several hairs in lower part. Anepisternum with one long seta near posterior margin. Postmetacoxal bridge present. Scutellum with a pair of long apical setae and a pair of lateral setulae.

Legs black. Fore coxa with strong one anteroventral seta near apex. Posterior surface of middle trochanter bare. Middle tibia with one anteroventral seta in apical quarter. Ventral surface of hind trochanter without short erect hairs.

Wing hyaline, with brown veins. Calypters whitish; margin of upper calypter white, margin of lower calypter darkened. Halter whitish.

Abdomen black, with hardly noticeable dark blue tinge, without striking setae. Posterolateral margin of tergite 5 with several fine hairs. Epandrium and surstyli as in Figs. 17, 18.

FEMALE unknown.

COMPARISON. The new species is close to *Paratoxopoda crassijoriceps* Duda, 1926, *P. barbata* Ozerov, 1993, and *P. glabra* Ozerov, 1993 by structure of male genitalia, but all those species have two dorso-central setae.

DISTRIBUTION. Central African Republic.

Toxopoda haladai sp.n.

Figs 14–16.

MATERIAL. Holotype ♂, Central African Republic, 60 km W Bouar, 05°42'N 16°00"E, 860 m, 30.III.2010, J. Halada (CULS).

DESCRIPTION. MALE. Body length 4.5 mm; wing length 2.9 mm. Head flattened dorsoventrally. Eye in profile roundish. Frons black, only reddish near anterior margin, matt. Face and gena light brown. Lower margin of face protruding anteriorly. Postcranium black, delicately greyish dusted. 1 orbital, 1 ocellar, 1 postocellar, 1 outer vertical setae present. Antenna light brown. Postpedicel in lateral view is apically narrowing, approximately 2.5 times as long as wide near base. One vibrissa present.

Thorax black, delicately greyish dusted. 1 postpronotal, 2 notopleural, 0+1 supra-alar, 1 postalar, 0+2 dorsocentral setae present. Proepisternum with several hairs near lower margin. Anepisternum with one long seta near posterior margin. Katepisternum delicately greyish dusted completely. Anepimeron bare, without hairs. Postmetacoxal bridge present. Scutellum with a pair of long apical setae.

Legs black. Fore coxa with strong one anteroventral seta near apex. Fore femur with two rows of spines ventrally. Mid femur curved at middle. Mid tibia with a row of short posteroventral setae. Hind femur with a row of dorsal setae in apical half. Hind tibia with 3–4 dorsal setae.

Wing tinged with brownish, with brown veins. Calypters whitish; margin of upper calypter white, margin of lower calypter darkened. Halter blackish.

Abdomen black, without strong setae. Epandrium and surstyli as in Figs. 14–16. Surstyli asymmetrical, not fused to epandrium.

FEMALE unknown.

COMPARISON. The new species has katepisternum delicately greyish dusted completely and asymmetrical surstyli as in *Toxopoda bequaerti* Curran, 1929, *T. vanschuytbroecki* Ozerov, 1993, *T. soror* Munari, 1994, and *T. au* Ozerov, 1998. The new species is close to *Toxopoda vanschuytbroecki* and *T. au* by structure of right surstylus, but differs clearly by structure of left surstylus.

ETYMOLOGY. The species is named after Czech entomologist Mr. Jiri Halada, the collector of the holotype specimen.

DISTRIBUTION. Central African Republic.

Toxopoda nitida Macquart, 1851
